

Management Science MBA

Management Science MBA Program Overview

The Carlson School's Management Science MBA (STEM-designated) is a Full-Time MBA degree that covers traditional management topics across business disciplines while developing students' capabilities in a specific set of skills, including statistical modeling, analytics, programming, forecasting, and operations research. The Management Science MBA allows students to better understand business organizational performance by developing data-driven decision-making skills grounded in the foundational business topics of the Full-time MBA curriculum.

- Management Science MBA students will complete the existing Full-time MBA core curriculum and [Enterprise programs](#) alongside traditional Full-time MBA students and have access to the same student advising, career coaching, and clubs.
- Students considering careers in finance, consulting, analytics or technology may consider pursuing the Management Science MBA to demonstrate proficiency in quantitative skills and subjects to employers.
- International students may consider the Management Science MBA as they could qualify for a [24-month STEM optional practical training](#) extension if their post-MBA employment meets specific STEM requirements outlined by the government. Learn more about the [24-month STEM Extension](#) on the ISSS website.
